Almaty Management University (AlmaU) Sustainable Food Policy

Preamble

As an ecosystem of more than 4100 students, staff and faculty, Almaty Management University (AlmaU) is committed to following the ethical sourcing of food and supplies and environmentally friendly practices. AlmaU recognizes the impact it makes on the environment and the local society. The food is served on campus based on the local sanitary regulations and state standards. The food is obtained from the local suppliers as possible and is recycled in a way to minimize waste.

Policy goals

1. Work with the local suppliers who adhere to the state standards and local sanitary regulations.
2. Source products locally and seasonally, where possible, to support the local economy and reduce environmental harm.
3. Raise awareness on minimizing the food waste through communications and promotion of sustainable lifestyle.
4. Look at the opportunities to develop policies on recycling, reusing, and reducing environmental harm across campus.

Involved parties

University leadership is responsible for general supervision of policy implementation.

Catering Services are responsible for achieving policy goals and adherence to sanitary regulations and state standards.

Administrative Services are responsible for providing technical support for the policy implementation.

Policy to be reviewed annually. For more information, please contact info@almau.edu.kz with 'Catering' headline.
